COMPANY PROFILE

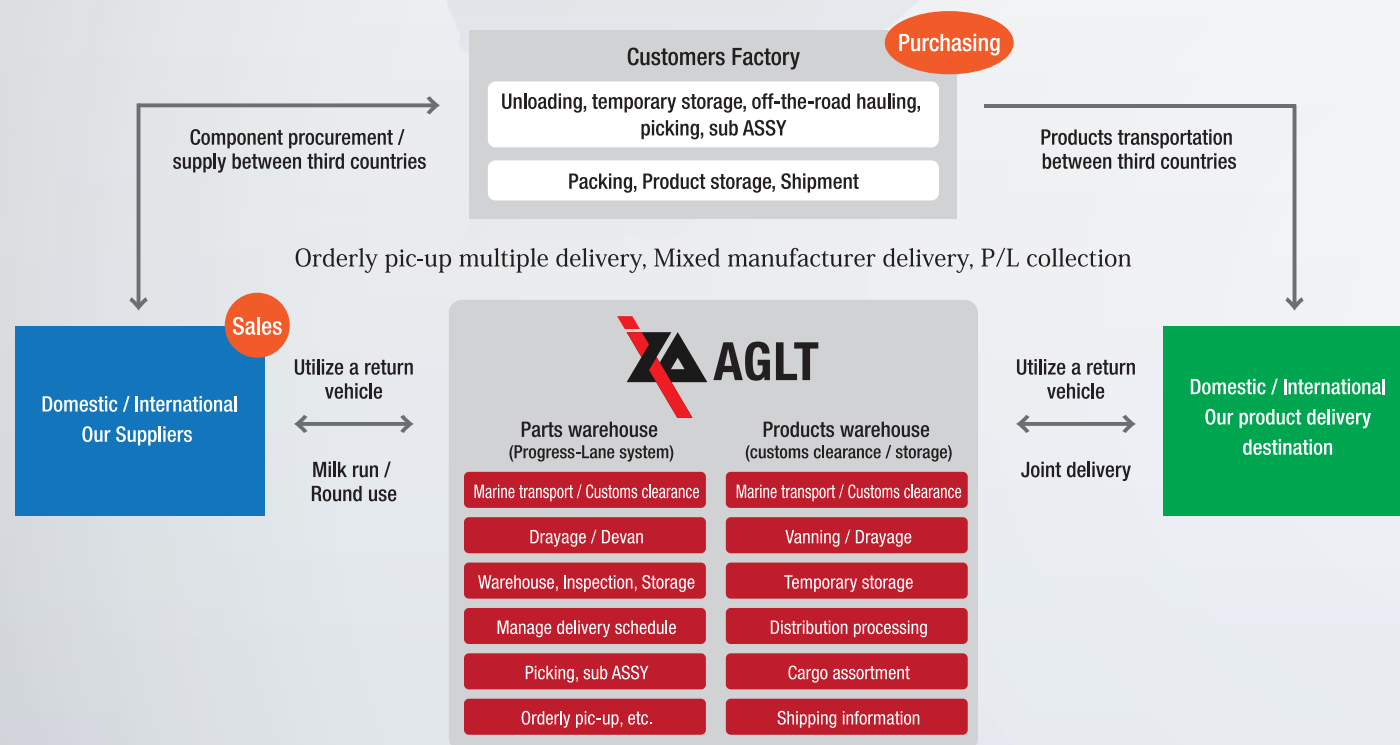

Moving Forward To Link The World.

With using total solutions we challenge the logistics industry in Thailand to outperform this more advanced technique.

OUR VISION

Provide international logistic service to support manufacturing

Not only storage warehouse, transportation/delivery, trade, but also taking orders, production/procurement, inventory management, collection. We provide added value with total solutions, which is beyond logistic.

Quickly meet the needs of the time, "Total Logistic"

We expanded into Thailand in 2013. We have a history of almost 100 years as a logistic company in Japan, and have been creating logistic systems, which meet customer needs. In addition to that, we have been trying to improve and innovate logistic system, adding to the normal logistic operation. Moreover, we believe that improvement and innovation of logistic are indispensable to the Thai future growth. We will continue to provide the best cost-performance of logistics in Thailand by combining a wide variety of logistic systems.

We are not the one who just carries and storage the products, but provide "Parts warehouse (Progress-Lane system)", "Simple assemblies", "Inspection/Picking" services to help our clients of manufacturing industry focus on their businesses. Moreover, our shipping / trading service enables "international integrated logistics" Although it is believed effecting logistic is a difficult theme, our professional service can make it easier. We will be very glad if you once experience our logistic service.

ASUTO GLOBAL LOGISTICS (Thailand) Co., Ltd. Managing Director
Morimasa Maehama

SERVICE

A new logistic company with 3PL system, which has never been in Thailand

We will propose the effective and cost-saving logistic innovation starting from procurement of parts/components to management of the produce/sales progress by cooperating with every client.

We have been providing total-logistic service, and also have been producing excellent results in this field.

Business Improvement Proposal

We will propose specific solutions and suggestions about planning, management and operation of logistics-process by researching and analyzing our client needs. We can also propose potential improvement-points with the number of cost, quality, service and loss of your business.

Warehouse, distribution processing

We will continue to make efforts to improve safety, reliability and speed of our service, and also support you with storage and even simple loading on our responsibility. In compound-storage center, we able to storage your products from the size of 1 cube meter.

Trading operation

If you import/export the product in trading, you will need to declare at customs and get permission. AGTL will promise speedy and fair procedure. We manage the total flow from port, warehouse, customs to shipment.

Transportation/delivery operation

We give careful service to deal with the needs of the wide-variety/high-frequency / small-quantity logistics. Our transport-arrangement service including domestic truck logistics, enables effective shipment by land, sea and air transportation.

WHAT WE DO

We always look one Step further. We support Industries for next Generation. ASUTO, that is the Road for Tomorrow! Current Industries highly grown, with Diversification. Globalization has been remarkable through development of Emerging countries. ASUTO is to respond any needs of Clients by Distribution service, Warehouse service, Linked with Global Logistics I.E. Custom Clearance, Overseas Procurement Logistics in innovative ways.
